Pintail Technologies Expands Global Sales Force

BESTech to Join Pintail Sales Force as New Rep in Korea

DALLAS (February 6, 2006) - Pintail Technologies, a breakthrough semiconductor test solutions provider, announced today that it has expanded its worldwide sales and technical support team to meet growing demand for its unique real-time test technology. BESTech will be representing the Pintail Technologies product line in Korea. BESTech, headed by Mr. J.K. Suh, will join Pintail's global sales force to focus on developing business and strategic relationships within Korea. Mr. Suh founded BESTech in 1999 and maintains a keen focus on the Korean semiconductor market with sales, field service, and applications support as key functions. The semiconductor industry in Korea will now have local sales and support resources for Pintail's leading real-time adaptive test software. In addition to the new presence in Korea, Pintail also has offices in Dallas, Austin, San Jose, Phoenix, Singapore, Taiwan, UK and Europe.

"We are very pleased to be joining the Pintail team," stated J.K. Suh, BESTech President. "Pintail's unique method of capturing and analyzing data in real-time is leading the market in innovation and value added. We are very excited to be able to represent Pintail in Korea, the value that our current and future product offering will bring to the Korean semiconductor industry is powerful."

"BESTech is a very welcome addition to our global sales and support infrastructure," stated Taylor Scanlon, President and CEO of Pintail. "Pintail just completed a record year of growth in 2005 and we are happy to expand our resources with a team like BESTech focusing on Korea. We believe that the Korean semiconductor market is a strategic one for us and we need good local support."

About Pintail Technologies

Pintail Technologies is a semiconductor test improvement company that provides breakthrough software to reduce the cost of test and increase production output and quality through existing test equipment and programs. Pintail has created the first test improvement solutions to combine real-time test process control capabilities with innovative analytical programs in an integrated software suite designed for speed and accuracy. Fabless and integrated device manufacturers worldwide, in collaboration with leading assembly and test suppliers, use Pintail tools to increase competitive advantage and hasten customer response. More information on the company and its solutions is available at www.pintail.com.

About BESTech

BESTech was founded in 1999 by J.K. Suh to specialize in sales, applications support, and field service for software and hardware used in semiconductor related productions. The operation expanded to include board repair, sales of Test and Measurement equipment, and optimization software. BESTech is headquartered in Seoul, Korea.
